PROFESSIONAL SUMMARY

Full Stack Java Developer with hands-on experience building end-to-end web applications using Java, Spring Boot, Spring Security, Hibernate/JPA, JWT authentication, and REST APIs. Experienced in developing AI-assisted applications using Spring AI, Ollama, embeddings, PostgreSQL, pgvector, and semantic search. Built a RAG-powered Resume Matcher that combines traditional keyword matching with vector-based retrieval to identify relevant resume content for job descriptions. Strong foundation in OOP, data structures, database design, and secure application development, with experience building responsive frontends using HTML, CSS, and JavaScript. Seeking a Full Stack Java Developer role to build scalable, secure, and intelligent web applications.

TECHNICAL SKILLS

Languages: Java, SQL, JavaScript, HTML5, CSS3

Frameworks & Libraries: Spring Boot, Spring Security, Spring AI, Hibernate/JPA, Apache PDFBox, Java Swing

AI & RAG: Ollama, Embeddings, Semantic Search, RAG, Vector Search

Databases: PostgreSQL, pgvector, MySQL, H2

Cloud: AWS (EC2, S3)

Tools: Git, GitHub, Maven, Postman, IntelliJ IDEA, Ollama, Jira

Concepts: OOP, Collections Framework, JDBC, REST APIs, JWT Authentication, MVC Architecture, CRUD Operations, RAG Pipelines, Vector Databases, Exception Handling

EDUCATION

Bachelor of Computer Science (CGPA:-8.01)

Jun 2023 – Jul 2026

Dr. G.Y. Pathrikar College of CS & IT, MGM University Chh. Sambhajinagar, India

PROFESSIONAL EXPERIENCE

Python Programming Intern, Vault of Codes India (Remote)

Aug 2025 – Sep 2025

- Completed a 1-month internship building hands-on experience in Python programming, application logic, and structured problem-solving.
- Applied core programming and OOP concepts to real-world project tasks, translating academic knowledge into working software.
- Collaborated with a development team, incorporating mentorship and code feedback into iterative improvements.

PROJECTS

Resume Matcher | RAG-Powered Spring Boot web Application

– github.com/Rahulrajput70202/resume-matcher

- Built full-stack RAG-powered Resume Matcher using Java, Spring Boot, Spring Security, PostgreSQL, pgvector, and Ollama
- Upgraded keyword matching with semantic search using 768-dimensional embeddings generated by nomic-embed-text
- Implemented PDF text extraction and chunking using Apache PDFBox for efficient resume processing
- Stored resume embeddings in PostgreSQL with pgvector and implemented vector similarity search for relevant resume sections
- Combined keyword matching with semantic retrieval to identify matched and missing skills against job descriptions
- Implemented JWT-secured authentication and responsive HTML/CSS/JS frontend for resume analysis and real-time results

Store Management System | Java Swing Desktop App

– github.com/Rahulrajput70202/java-store-management

- Built a desktop inventory management app in Java Swing with a fully interactive GUI, automating CRUD operations across all inventory records
- Implemented add, update, delete, and search functionality using DefaultTableModel for dynamic, real-time table updates
- Developed a billing module with automatic itemized total calculation and editable rows, cutting manual calculation errors
- Designed a custom-styled UI (buttons, fonts, layout) to improve usability and data-entry speed
- Roadmap: MySQL integration, PDF/Excel export, role-based login
